Self-Disclosure
REACH Conformity

Directive (EC) No. 1907/2006 for the registration, evaluation, authorization, and restriction of chemical substances (REACH) from December 18, 2006 (REACH directive), regulates the use of chemical substances in preparations and articles.

VITRONIC Dr.-Ing. Stein Bildverarbeitungssysteme GmbH, as a manufacturer of electronic products, is a downstream user as defined in the REACH directive 1907/2006.

Pre-registration and registration obligations that result from the production of substances and chemicals and their introduction to the market do not apply to us.

In accordance with Article 3, Para. 3 of the REACH directive our products are articles, and therefore are not classified as substances or preparations (see Article 3, Para. 1 and 2 of the REACH directive). In addition, no substance is released by the articles under normal and reasonably foreseeable conditions of use. Therefore VITRONIC GmbH is subject to neither compulsory registration nor an obligation to produce safety datasheets.

We ensure that we currently do not use any substances from the candidate list of substances of very high concern (SVHC) in the production of our products.

In accordance with Article 33 of the REACH directive, we will inform you immediately, if in the future, any substances found in the chemicals we use are classified by the ECHA (European Chemicals Agency) as substances of very high concern.

As a downstream user, we will support manufacturers of substances and preparations by providing information pertinent to registration, if the substances are used in a manner different from that specified in the new safety datasheet or chemical safety report.

To ensure that our customers continuously receive reliable and safe products, we ensure that our suppliers meet all of the requirements relevant to chemical substances and materials.

As part of certification in accordance with DIN EN ISO 9001, we include REACH registration of relevant substances as criteria for supplier qualification of our upstream suppliers.

Best regards,

VITRONIC Dr.-Ing. Stein Bildverarbeitungssysteme GmbH
