EU Directive 2011/65/EU (RoHS II)

VITRONIC Dr.-Ing. Stein Bildverarbeitungssysteme GmbH has adopted a formal position on the aforementioned directive regarding the restriction of the use of certain hazardous substances in electrical and electronic equipment dated June 8, 2011, which replaced Directive 2002/95/EC (RoHS) on January 3, 2013. In Germany, the directive is enforced through the ordinance on the restriction of the use of certain hazardous substances in electrical and electronic equipment (ElektroStoffV). Accordingly, it is not permitted to bring to market electrical and electronic equipment which contain more than 0.1 percent by weight of lead, mercury, hexavalent chromium, polybrominated biphenyl (PBB), or polybrominated diphenyl ether (PBDE), or more than 0.01 percent by weight of cadmium per homogeneous substance.

We hereby declare that our products we declare as RoHS-compliant have been designed and manufactured in accordance with Article 4 of Directive 2011/65/EU and therefore the substances used do not exceed the aforementioned thresholds.

We take our obligation to manufacture products that are as safe as possible and to deliver them with the highest degree of safety very seriously.

The following procedure supports compliance with applicable regulations and statutory provisions:

- Our suppliers are obligated to comply with substance prohibitions and declaration obligations in accordance with RoHS. Transparency, a close partnership, and a lively exchange of information are the cornerstones of our business relationships. They help us ensure that supplied parts meet our requirements.
- Newly developed VITRONIC products that lie within the scope of RoHS are categorically produced in an RoHS-compliant manner.

Our products are designed for a wide variety of applications in the industrial sector, which sometimes may not necessarily lie within the scope of Directive 2011/65/EU (RoHS II). Nevertheless, under consideration of the environment and human health, we have changed our production processes so that they comply with RoHS.

Products that comply with the thresholds set forth by Directive 2011/65/EU (RoHS II) are marked as "RoHS compliant" in our documentation and publications.

Our team is always available to answer any questions you might have concerning VITRONIC products and the Directive (RoHS II) (email: ce-koordination@vitronic.com).

Best regards,

VITRONIC Dr.-Ing. Stein Bildverarbeitungssysteme GmbH
